Overview

The Business Enterprise Information Services (BEIS) provides an overarching solution to link existing disparate programs to establish an enhanced and enterprise-driven financial management capability. By leveraging the Department of Defense's (DoD's) current investment in information technology, BEIS eliminates redundancy and facilitates reduction of solution costs for financial management operations. BEIS, as a suite of services, supports enterprise financial visibility goals by:

- Establishing the authoritative source for Standard Financial Information Structure values and providing for standardization by implementing SFIS and United States Standard General Ledger compliant financial reporting capabilities for Audited Financial Statements and Budgetary Reports;

- Providing an enterprise wide information environment that will serve as the single source for enterprise-wide financial information;

- Serving as the DoD-wide system for Treasury reporting;

- Providing decision makers with significantly greater access to financial information through data visibility and business intelligence; and

- Supporting implementation of Target Financial Systems (Service Enterprise Resource Planning Systems (ERPs).

Capabilities

BEIS builds upon existing infrastructure to provide an enterprise-level suite of services. This suite of services is comprised of a core set of financial enterprise business capabilities that deliver timely, accurate, and reliable business information across the DoD in support of financial reporting. These capabilities are organized into six distinct lines of business:

- Financial Reporting Services
- Cash Accountability Reporting Services
- Enterprise Level Business Intelligence Services
- Integration Support Services
- Reference Data Services
- General Ledger Services

Benefits

- Departmental Audited Financial Statements
- Departmental Budgetary Reports
- Cash Accountability Reporting
- Fund Balance With Treasury Reconciliation
- SFIS Library Data
- Master Appropriation Data
- Corporate Electronic Fund Transfer Data
- Transportation Global Edit Table Data
- Enterprise Business Intelligence

The Defense Business Systems Acquisition Executive (DBSAE) provides management oversight to BEIS. The DBSAE is responsible for driving the successful implementation of DoD systems and initiatives in support of the Department's business transformation goals. Its mission is to develop, coordinate, and integrate projects, programs, systems and initiatives providing DoD enterprise-wide business capabilities to the warfighter.
